| PRECUT UNFRIED CHIPS FOR FRYING  |                            |                 |                 |            |
| Shelf Stable: Store in a cool dry place.   |                            |                 |                 |            |
| If stored under Refrigeration: Bring precut unfried chips to room temperature 8 hours before use.  |                            |                 |                 |            |
| Use hands to lightly separate any clumps of precut unfried chips before frying. Fry chips in a 350°F fryer for approximately 30-40 seconds or until bubbling stops and desired color is achieved. Keep partially used bags closed, as chips will tend to dry if left open. |                            |                 |                 |            |
